SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT

MEMORANDUM

DATE: January 26, 1990
TO: All Permit Processing Engineers
FROM: William J. Dennison /s/ WJD by wez
SUBJECT: Source Test Conditions on Permits to Operate

Prior to issuing a permit to operate, which includes a condition requiring periodic source testing, please coordinate that condition with both Enforcement and Source Testing. Enforcement will have the lead role once the permit to operate is issued and should be aware of the requirement and the reason for it. Also, Source Testing should receive a copy of the permit so that they can coordinate their field measurements with those required by our permits.
